AI Usage Declaration

CGD 460 Assignment 2 Stormwatch Harbour

Field	Answer
Student name and ID	Hashar Qaisar Chaudhary - 233062
AI tools used name and version	OpenAI Codex assistant (exact underlying model version not exposed in this chat); Qwen2.5-0.5B-Instruct Q4_K_M, revision 9217f5db79a29953eb74d5343926648285ec7e67, llama.cpp b11669.
Tasks for which each tool was used	Codex: interpreted the brief, designed and wrote simulation, controller, tests, analysis, figures, report and documentation. Qwen: generated Harbour Master decisions and experimental responses; raw outputs were logged.
Prompts given main ones	Main request: "create this assignment ... complete this assignment"; follow-up: "do on your own". The full operational five-part prompt and examples are in src/master.py; all experiment prompts and responses are in logs/llm_log.jsonl and logs/security_log.jsonl.
What you changed or verified yourself	To be completed by the student after reviewing and running the code. Automated tests and replay checks performed by the assistant are not claimed as independent student verification.
Parts of code written with AI assistance	All supplied Python implementation, tests, experiment scripts, report generator and documentation were created with substantial AI assistance.
Signature and date	Student signature: _____ Date: _____

Review this declaration for accuracy, add your own verification and changes, and sign it yourself before submission. The mandatory viva requires you to understand and defend the implementation.
